Catenai PLC

("Catenai" or the "Company")

Alludium Named Founding Technology Partner for AgenticInvestor

Catenai PLC (AIM: CTAI), the AIM-quoted provider of technology and digital solutions, is pleased to announce that Alludium Ltd ("Alludium"), its investee company, has been named the founding technology partner for AgenticInvestor, a new open-source platform and community for private-market investors led by Sure Valley Ventures ("SVV"), the specialist AI venture capital firm.

AgenticInvestor is an open-source initiative designed to help venture capital firms move beyond AI experimentation and deploy AI agents across repeatable investment workflows. The platform shares practical workflows, tasks, skills and agent blueprints spanning the investment lifecycle.

As founding technology partner, Alludium provided the platform on which the AgenticInvestor workflows were built, tested and refined using SVV's own investment processes. The initiative demonstrates how Alludium's Agent Operating System can support structured, repeatable workflows within a live venture capital environment.

At launch, AgenticInvestor, available at www.agenticinvestor.org, includes the Deal Pipeline Blueprint, comprising 20 tasks and 19 skills supporting company screening, opportunity evaluation, diligence preparation and Investment Committee memo creation. Throughout the process, AI is designed to support, not replace, human judgement, with review, accountability and evidence remaining central.

The announcement follows Alludium's strategic focus on the venture capital sector, where the Company believes structured, repeatable workflows present an ideal environment for enterprise AI adoption.

John Frizelle, Founder and CEO of Alludium, commented:

"AgenticInvestor is an important step for the investment community because it moves the discussion from AI as a research assistant to AI as part of repeatable execution. The workflows being shared through the initiative were

developed and tested on Alludium in the context of real venture work, where source-linked outputs, human review and clear ownership are essential. That is exactly the operating layer we have been building Alludium to support."

Barry Downes, Managing Partner of SVV and Founder of AgenticInvestor, commented:

"Venture capital is entering a new phase of AI adoption. The next step is not simply asking better questions of a chatbot, but embedding agents into the repeatable workflows that sit behind sourcing, screening, diligence and investment decision-making. AgenticInvestor is intended to share practical workflows with the wider investor community, and Alludium has been an important founding technology partner in helping us develop and test those workflows inside a working venture firm."

John Farthing, Interim Chief Executive Officer of Catenai PLC, commented:

"We are pleased to see Alludium's role as founding technology partner for AgenticInvestor. The launch highlights the practical application of Alludium's platform in a specialist vertical where structured workflows, trusted outputs and human review are central to adoption. It also underlines the continued progress Alludium is making as it seeks to establish itself as the AI execution platform for venture capital."

The person who arranged for the release of this announcement on behalf of the Company was John Farthing, Interim Chief Executive Officer. The Directors of the Company are responsible for the release of this announcement.
